SOLID ROCK CHUCH (CLAREMONT)

About the Family

Alexis and I met in high school in 2006. We started dating, went to college, and have been together ever since. We were married in August 2014 and currently live in downtown Claremont with our dog, Maggie.

Alexis is the Director of Sustainability at Pomona College, the number one college in America, according to Forbes magazine. Trust me, she's a genius! I started working at a church when I was 17. I was an intern, coordinator, director and then pastor. I have a huge love for church media, simple design, mid-century modern furniture/architecture and modern art.

Alexis and I both love traveling to different places, eating/trying new foods, cooking and going to art museums. Like good millennials, we also love coffee!

About the Church Plant

Solid Rock Church launched Easter 2014. We have a vision to be a gospel-centered family on mission to participate in the redeeming work of Jesus. We recently moved into a permanent space and are working to renovate much of the 70 year old building- it was actually the second Church building ever built in our city. By God's grace we have become a multiethnic, multigenerational, and a diverse socio-economic people. In our first two years we've worked to plant a spanish-speaking church in Pomona, California and have two more Church Planting residents raising funds and preparing to plant in Los Angeles County.
